Professional Summary

Results-driven software engineer with 5+ years of experience designing, developing, and deploying scalable web applications. Passionate about writing clean, efficient code and implementing cutting-edge technologies. Strong collaborator with a proven track record of delivering projects on time and exceeding client expectations.

Experience

Senior Software Engineer – ABC Tech, San Francisco, CA (2019–Present)

- Lead a team of 5 developers in building cloud-native applications using AWS and Docker.
- Designed and implemented RESTful APIs with Django and FastAPI.
- Reduced application latency by 40% through caching and database optimization.
- Mentored junior developers, conducted code reviews, and established best practices.
- Coordinated with product managers to translate business requirements into technical solutions.

Software Developer – XYZ Innovations, Los Angeles, CA (2017–2019)

- Developed and maintained React-based front-end components.
- Integrated third-party APIs and optimized data flow for performance.
- Wrote automated test cases using pytest and Jest to ensure code quality.
- Collaborated with UX/UI teams to improve usability and accessibility.

Education

Degree	Institution	Year	GPA
B.S. in Computer Science	University of California, Berkeley	2019	3.8/4.0
Minor in Data Science	University of California, Berkeley	2019	3.9/4.0

Technical Skills

Programming Languages: Python, JavaScript (ES6+), TypeScript, Java
Frameworks: Django, Flask, React, Node.js, FastAPI
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, Docker, Jenkins, AWS, Terraform
Testing: PyTest, Jest, Selenium
Other: Agile Methodologies, CI/CD, RESTful API Design

Certifications

- AWS Certified Solutions Architect – Associate (2022)
- Certified Kubernetes Administrator (CKA) (2021)
- Google Cloud Professional Developer (2020)

Selected Projects

- **Smart Expense Tracker** – Developed a full-stack application using Django REST and React for tracking expenses and visualizing spending habits.
- **Real-time Chat App** – Built a scalable WebSocket-based chat system using FastAPI and Redis Pub/Sub.
- **Data Visualization Dashboard** – Created interactive dashboards with Plotly and D3.js to monitor business KPIs.
